

# VostroNet

VostroNet provides high-speed internet to co-working spaces. We are an end-to-end provider, operating a software-defined network through our Q2 Software Platform™

## Key Features

### Seamless connection

Wireless internet with our own dedicated 10 Gbps fibre to the building.

### Powerful network tools, easy to manage

VostroNet's easy-to-use integrated software allows building management to quickly and easily on-board new residents.

### Support for all users

24/7 monitoring and technical support with a dedicated round-the-clock escalation manager.

### Quality

Personal solutions including white-labelled internet to add value to your brand.

## The VostroNet Difference

We lead the industry in software-defined networks, harnessing software to optimise performance and user experience. Our entire network is monitored and maintained in real-time through our industry-leading Q2 Software Platform™, proactively resolving issues and keeping our customers happy.
